AGELESS LIVING BY MONY VITAL PDF

Every human being has the notion that he or she may be able to live forever or live longer or experience optimal well-being once, or become an ageless physical being at some point in their life. There is a reason for that. The physical body does not want to accept the prevailing beliefs of the culture's stand about death. It is a reverse message sent from the body, as an S.O.S. call to revive or to reclaim some type of sovereignty on the future for his own existence. Unfortunately, our logical (critical) mind is in no mood to challenge the beliefs of the culture of death we live in. Besides, most individuals lost their courage to stand up for their instinctive beliefs in favor of the culture and the society at large.

The issue of eliminating death from the population is not my objective and not something that is possible to do on large scale during one or two generation time. As I travel and see the world, all cultures are totally inner connected for adhesive masses, as nationalism, social, ethnicity and religions beliefs meshed together to create the perfect moral citizen for the state which promote only one basic belief, the death belief.

Appreciate Your Physical Body

By DuVall

This is a book that was written not just to make a killing but obviously the author has an unique story to tell: do not accept the culture of death, live with your vision focused on permanent physical life, or ageless living.

Actually I was taken aback by the emphasis Vital places on the possibility of living for hundreds of years on the same body here on the surface of the planet.

I have read several metaphysical books and I can tell you this one with its logical originality hits the bull's eye. Some tell us that the kingdom of Love is to be found here and now, it is within and not necessarily a place after death. Yet Vital is talking about physical immortality which is a totally different ball game altogether.

This immortality thing requires love and an appreciation of the physical body which is common sense since how can you love yourself if you are not grateful for the body's wonderful mechanism that keeps you alive?

I recommend this original publication to anyone who is drawn to read it, and remember that this is serious business and should not be taken lightly.

Ageless Living by Mony Vital

By Patricia Wortsmith

I have read many many books in my life, but this one really hit me between the eyes (in a good way!)! I had no idea how brain washed we are about death. It is such a great book! Mony Vital has done the world a tremendous service by writing this book. Everyone should read it! I also highly recommend that everyone read Natural Cures They Don't Want You To Know About by Kevin Trudeau. Read both of these books. They will absolutely change your life for the better!!! Thank you so much Mony and Kevin!

Mony Vital...The real deal!

By Timeswimmers

I met and enjoyed knowing Mony. Yes, he left his body but how long was he in it? If he followed the advise in his book, of not disclosing your age after a certain age, he could have been any age! And he certainly was youthful. But the energy he gave off was wisdom such that he could have been any age. I was a co-presenter with him at a conference in Las Vegas. (Lost Wages to some). At the end of the night of his presentation I bought his book and went to my room...where I stayed up 6:00 in the morning reading it. I couldn't put it down! I had spent years reading many books, practicing Meditation, been a Rosicrucian etc. but his book opened my eyes to a reality I had never even guessed at before! Do your self a favor, particularly at \$.01 plus shipping? for a used copy?! Unless you just want to die, this book will change your life!
