COLOR HARMONY IN WEB DESIGN BY STEPHEN BUCARO

PDF

Without color harmony your webpage gives your visitors an uneasy feeling of disorder. The colors seem to clash and are unpleasant. When you have color harmony, your webpage has a pleasing balance of color's that seem to go together naturally.

Certain color schemes will give your website visitor a feeling of calmness, while others will project power and authority. There are specific color schemes that go with websites related to nature, food, business, art, and music.

In this book you'll learn different methods of selecting colors to create harmony, how to design for accessibility and you'll learn how color is coded on the web using styles and hexadecimal notation.

One choice of colors can give your website an impression of conservatism, authority, and reliability. While a choice of different colors can give an impression of wild and mysterious. This book shows you how to create the impression you want.

Simple yet powerful

By poojadsr

I have been trying to create designs but every time I was disappointed with my own efforts. I learnt once in school about basic color harmony but all forgotten. This book not only refreshed my mind but also revealed some simple rules that can make a design really effective. I recommend this to all those who really want to learn about color harmony as well as those who want to create something on their own, obviously for a beginning. Its not for designers quenching for expertise. its very basic and for beginners. However, it can be a good refresher for people already designing but have lost touch of basics.
