Todos hemos compartido alguna vez esa sensación de que la genética interviene de manera decisiva en nuestras vidas, si bien no acabamos de comprender los caminos que conducen a que seamos como somos, tan parecidos y al mismo tiempo tan diferentes de quienes nos rodean y con quienes compartimos orígenes biológicos.

En la tradición de los mejores libros de divulgación científica, mediante ejemplos sencillos y gran sentido del humor, esta pareja de biólogo y periodista nos ayuda a satisfacer nuestra curiosidad por aquellas cuestiones genéticas que tanto nos intrigan y preocupan, tales como si la calvicie es hereditaria, de qué depende la longevidad o si existe una mágica combinación de genes que facilite el aprendizaje de idiomas. Una amena introducción a la genética humana en forma de diálogo, que consigue atrapar al lector en un recorrido breve y muy entretenido que nos conduce del microscopio y el laboratorio a la vida cotidiana, desterrando tópicos y malentendidos gracias a la excepcional capacidad didáctica de sus autores para traducir complejos conceptos de biología o química molecular al lenguaje común, sin traicionar su contenido científico.
