From the Back Cover

The City in the Developing World is a comprehensive and up-to-date introduction to urbanisation in developing countries.

The goal of this text is to place an understanding of the developing world city in its wider global context. First, this is done by developing the concept of social surplus product as a key to understanding the character of the contemporary Third World city. Second, throughout this text, the city in developing areas is centrally placed in the context of global, social, economic, political and cultural change. Thus, the important themes of globalisation, modernity and postmodernity are examined both in relation to the structure of sets of towns and cities which make up the national or regional urban system, and in respect of ideas and concepts dealing with the morphology, structure and social patterning of individual urban areas.

Key features

- * written by experienced and well respected authors
- * written in a clear and concise manner for undergraduate and masters level students
- * provides coverage of topics of current concern; including environmental sustainability and the structure of Third World cities, basic needs including health, food and nutrition, gender and cities
- * explores the links between globalisation, cities and development
- * examines the relevance of postmodernity, modernity, convergence, and divergence to developing world cities
- * includes a comprehensive bibliography

The City in the Developing World is a core text for second and third year undergraduates in the fields of geography, development studies, planning, economics and the social sciences, taking options which deal with development issues, development theory, gender and development and Third World development.
